

Brief description of the academic discipline (abstract)  
for the catalog of optional academic disciplines

**Sectional course**

---

(name of optional academic discipline)

Specialty	222 "Medicine"
Educational level	Master's degree
Term of study (course)	Fifth course
Form of education	Full-time
Department	Department of Pathological Anatomy

**Brief content of the discipline:**

The subject "Sectional course" as an educational discipline lays the foundations for the formation of students' abilities and skills, which are determined by the ultimate goals of studying the sectional course, as an independent discipline, and can be used by students in the process of further education and in the future in professional activities. As a result of studying the academic discipline, the student should know: the organization and capabilities of the patho-anatomical service of Ukraine, the methods of patho-anatomical research, the theory of diagnosis and causes of death; to be able to: carry out a clinical and anatomical analysis of biopsy, operative and sectional material, make clinical and patho-anatomical diagnoses and compare them with each other, determine the causes of death, draw up a medical certificate of death and a certificate of the cause of death.

**Approximate list of subjects of educational classes (lectures, practical, seminar):**

(Lectures and seminars are not provided)

**1. THEMATIC PLAN OF PRACTICAL LESSONS**

<b>№</b>	<b>TOPIC</b>	<b>Number of hours</b>
1	The role and place of the pathologist in the health care structure	2
2	Job requirements for the pathologist and staff of the examination room.	2
3	Equipment and equipment of the prosector.	1
4	Autopsy technique. Peculiarities of autopsy of a baby's corpse/ Preservation of organs after dissection. Embalming and cleaning the corpse.	3
5	Study of biopsy surgical material.	2
6	Theory of diagnosis. Comparison of final clinical and pathological diagnoses. Causes of death. Issuance of a medical certificate of death and certificate of the cause of death. Clinico-pathological conference. Treatment and control commission.	5
7	Credit lesson.	5
	<b>TOGETHER</b>	<b>20</b>

## THEMATIC PLAN OF INDEPENDENT WORK

№	TOPIC	Number of hours
1.	Preparation for practical classes – theoretical preparation and development of practical skills	7
2.	<b>Working on topics that are not part of the classroom lesson plan:</b>	
2.1	Pathomorphological foundations of resuscitation and intensive therapy (features of morphological changes in organs and tissues).	2
2.2	The role of modern morphological research methods in the diagnosis of head and neck diseases.	2
3.	<b>Preparation for credit class</b>	2
TOGETHER for module 1		<b>13</b>
TOGETHER		<b>13</b>

### The list of competencies, the acquisition of which will be provided by the training discipline:

1. The student must be competent in the peculiarities of the organization and capabilities of the patho-anatomical service of Ukraine, methods of patho-anatomical research,
2. The student must be competent in the theory of diagnosis and causes of death. to be able to: carry out a clinical and anatomical analysis of biopsy, operative and sectional material, make a clinical and pathological diagnosis and compare them with each other, determine the causes of death, draw up a medical certificate of death and a certificate of the cause of death.

**List of scientific and pedagogical (pedagogical) workers who will ensure the implementation of the educational discipline:**

1. Head of the department, MD., professor Igor Davydenko
2. Assistant professor, PhD Olena Tuleneva
3. Assistant professor, PhD Olexander Lazaruk
4. Assistant professor, PhD Vitaliy Ilika
5. Assistant professor, PhD Olexandra Harvasyuk

Head of the department

A handwritten signature in blue ink, consisting of a large loop followed by a series of strokes that form the letters 'ID' and a long horizontal tail.

Igor DAVYDENKO
